

USE & CARE INSTRUCTIONS. Model #SFKDF1

Installation:

1. Unscrew existing shower head from shower arm. Use pliers if needed.
2. Screw filter housing onto shower arm. Insert O-ring between shower body and shower arm or use plumbing tape to secure threads. Do Not use O-ring and plumbing tape together (choose only one). We do **NOT** recommend to use pliers since shower body made from plastic, please use your fingers. In case of leak you can tight up connection later.
3. Screw shower head onto filter housing (front). Make sure second protective O-ring inserted as shown on picture.
4. Do not use with a shut-off valve.
5. First use. Flash water through shower filter for 3-4 min. Because of carbon water can be blackish for couple of minutes.

Operation:

1. Cool to desire temperature before entering shower.
2. Replace the filter cartridge every 7000 gallons or 8-12 months which comes first.

Cartridge Replacement:

To open: unscrew shower filter housing. Use both hands.

Remove used filter cartridge.

Clean and lubricate O-ring with petroleum jelly.

To close: screw housing together.

We recommend to change shower filter cartridge every 12 months for family of 1-2 members, or 8 months for family of 3-4 members.

Where to buy shower filter cartridges:

- Amazon.com
- ReverseOsmosisRevolution.com

The KDF-55/Carbon shower filter removes up to 96% of chlorine/chloramine. The KDF-55 media also removes or reduce hydrogen sulfide, scale, microorganisms, and water-soluble heavy metals such as nickel, chromium, iron, lead, mercury etc.

KDF process media also kill bacteria and inhibit the growth of bacteria, algae and fungi. Also KDF media fight with lime scale, mold and fungi.

KDF process media are completely safe so the process is not toxic and does not cause any adverse side effects. Effective for both hot and cold water.

Product Specification:

- rated Service Flow 2.5 Gallon per minute
- maximum operating temperature 120 Fahrenheit
